Upper-Intermediate (B2)

Aleksander Wacławik

Junior Fullstack Developer | React · Next.js · TypeScript · Node.js

PROFILE

Self-taught fullstack developer with a modern JavaScript stack (React, Next.js, TypeScript, Node.js) and over 6 years of hands-on commercial e-commerce experience. At Motormind I work across the full stack of a high-volume automotive store (around 900 orders per day in season), building internal tools, marketplace integrations and custom sales features. In parallel I have delivered around 10 freelance projects end to end, deploying and administering them on my own VPS. Fluent with AI-assisted development (Cursor, Claude, OpenAI), which I use daily to ship faster and keep my learning curve steep. Looking for a junior or mid fullstack role, remote or hybrid (Poznań), with a clear path toward senior.

KEY HIGHLIGHTS

- Engineered an internal complaint-management system (Node.js, REST API) integrated with the company ERP (Subiekt GT) and database, replacing a manual process and automatically notifying customers at every status change
- Built a Python scraping engine that tracks competitor prices, identifies best-selling products and surfaces SEO-ready descriptions, feeding pricing and ranking decisions across the catalogue
- Shipped around 10 freelance web projects end to end, including commercial sites (motoporadnia.pl, bazantv.pl), self-hosted and maintained on my own VPS (Ubuntu, nginx, pm2, SSL)
- AI-fluent workflow (Cursor, Claude, OpenAI) used daily for faster delivery and independent problem-solving rather than leaning on a senior at every step

EXPERIENCE

E-commerce & Web Developer

Motormind · Poznań · 03.2019 - present

Client-advisor role on paper, in practice around 40% hands-on development in the company's e-commerce stack (automotive, around 900 orders per day in season).

- Designed and built an internal complaint-management system with Subiekt GT and database sync over a REST API, automating a previously manual workflow and keeping customers informed at every stage
- Developed a Python scraping engine for competitor price monitoring, best-seller detection and SEO-oriented description analysis, used to improve the store's own pricing and search ranking
- Coded an interactive size guide that stores customer measurements and recommends a size across products in three fit segments (snug, perfect, loose), live in production on client stores
- Automated the marketplace order flow (Allegro, Amazon, Kaufland) by configuring the Sublinker, Baselinker and Subiekt GT integration end to end, including custom automation rules
- Maintained and extended the Shoper store (Shoper Storefront, Twig): template changes, sales-driven front-end features and ongoing improvements

Freelance Web Developer

Self-employed · 01.2025 - present (earlier non-commercial projects since ~2023)

- Delivered around 10 projects end to end (concept, design draft, client iteration, implementation, deployment), including commercial work for external clients
- Built with Next.js, React, TypeScript, Tailwind CSS and Framer Motion, then deployed and administered on a self-managed VPS (Ubuntu, nginx, pm2, SSL, DNS)
- Maintain 3 recurring clients alongside a full-time job, sustaining the relationships mostly through referrals

SELECTED PROJECTS

MotoPoradnia.pl · freelance, commercial

Next.js · React · TypeScript · Tailwind CSS · Framer Motion · motoporadnia.pl

- Sole developer of a responsive company site for a Poznań motorcycle service and authorised Royal Enfield, QJMotor and Voge dealer: structured service subpages, pricing, contact and content optimised for local SEO, supporting customer acquisition from Google

BazantTV.pl · freelance

Next.js · React · TypeScript · Tailwind CSS · bazanttv.pl

- Designed and built a landing and community page for a group of Polish streamers, focused on brand identity, creator profiles and a strong, animated visual style

Motormind internal tools · commercial, in production

Node.js · REST API · MongoDB · Python · Subiekty GT

- Complaint-management system with ERP and database sync plus automated customer notifications, alongside a scraping engine for competitor pricing and SEO, both in daily production use

EDUCATION & COURSES

- GameDev (C++), LabaIT, completed 04.2026, certificate with distinction (instructor: lead gamedev from CD Projekt)
- Frontend Web Development, YouCode
- Continuous self-learning: official docs (MDN, framework docs), Stack Overflow and community resources
- Landscape Architecture Technician, Zespół Szkół Budowlano-Drzewnych, Poznań

EARLIER EXPERIENCE (UK)

- Barista Maestro / canteen supervisor, Gather & Gather, Reading (07.2017 - 08.2018): team coordination, POS, daily reporting and stock ordering via an internal system
- Main Barista, Costa Coffee, Reading (10.2016 - 06.2017): customer service, POS and daily reports

I hereby consent to the processing of my personal data contained in this document for the purposes of the recruitment process, in accordance with Article 6(1)(a) of the GDPR (Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016).
